Cereals for kids – GLUTEN-FREE

Gluten-free food for children has become more wide-spread in the recent years either because such diet is required due to coeliac disease, i.e. gluten sensitivity, or because the parents believe that gluten-free food is healthier and better for children. However, it's not always easy to adhere to such a diet so Podravka, in line with the trends, expanded its product line with two gluten-free cereal options for kids: Lino Honey Rings and Lino Choco Caramel Flakes.

Lino gluten-free breakfast cereals are produced in a purpose-built, certified facility within the Koktel Factory that meets all the requirements for gluten-free manufacturing. The composition of these products is another proof of their top quality, and parents can rest assured that their children are enjoying delicious and high-quality meals!

CREAM SPREADS

LINO LADA CREAM SPREADS
LINO LADA PEANUT BUTTER

Tasty, delicious products carefully prepared to support our happy and healthy growth, from the first spoon with which we start to discover the rich, diverse and magical world of flavours.

Lino products are exactly what we need for a happy childhood, but they are also loved by those who are not so little anymore.

Cream spreads

Lino Lada cream spreads are top quality because they are made using only natural ingredients. Their main ingredients are milk, hazelnuts and cocoa.

Today, Lino Lada is available in stores in 5 different flavours, and it's difficult to tell which one is the best. Some will say it's Lino Lada Duo because it has two sides: a light one and a dark one. Some prefer Lino Lada Milk which contains a lot of milk. Those who like exotic flavours will reach for Lino Lada Coconut.

For consumers who always opt for premium dark cream spreads rich in hazelnuts, the Lino Lada Gold range offers the best choice: Lino Lada Gold cream spread with 16% hazelnuts enriched with chopped hazelnuts, or Lino Lada Gold Creamy for those who prefer super creamy textures without compromising on high hazelnut content and the characteristic Gold aroma and taste.

With Lino Lada,
every task is
easier, and every
moment spent
with family and
friends more fun.

Good to know:

- Lino Lada cream spreads are high quality, easy to spread and come in a wide range of tastes and aromas

Tomato products and tomato sauces

In every culinary tradition, especially Mediterranean cuisine, tomato is a staple, an essential that goes really well with a number of other ingredients. Tomatoes are naturally rich in lycopene, and the nutritional value of this powerful antioxidant is preserved in Podravka's tomato products. Our best-seller is the tomato puree Passata 500g, which contains no added salt or additives. Podravka's tomato products are great-quality kitchen staples that can be used to make soups, stews, goulashes, sauces and other everyday meals. Our tomato paste is called "double concentrate" because it contains 28-30% dry matter for a richer and fuller flavour, a specific pleasant aroma and an appetizing red colour.

.....❤️.....
Primordial
pleasure from the
depths of the sea!

Good to know:

From times immemorial, to live by the sea has meant to live off the sea. In the seaside town Rovinj, people have always lived off fresh and salted fish, mostly sardines. The tradition of fish salting by hand started to fade with the arrival of industrialisation and the fish canning plants.

The first factory of this kind was opened in Rovinj in 1877 by the company Société Générale Française de Conserves Alimentaires as one of the first fish canneries in the world. The Ampelea factory, built on the foundations of the first canning plant, operated successfully until 1954 when it changed its name to Mirna.

Such products are always fresh, and the tempting smell of freshly baked goodies emanating from in-store bakeries encourages consumers to buy the products. Žito's parbaked products are partially baked, meaning the crust has formed but has not yet achieved the desired colour. They can be finished off by baking to completion quickly and easily, and have an extended best use period according to the regulated storage regime (up to 6 months).

Good to know:

- Fresh and warm products are always available for the consumers at the store
